

Package: stdictkr (via r-universe)

July 5, 2024

Title Data Package using Korean Standard Dictionary

Version 0.0.0.9000

Description stdictkr is a client package that uses the API provided by 'the Korean standard dictionary' <<https://stdict.korean.go.kr/openapi/openApiInfo.do>>. You can also directly download a dictionary and use it as a tibble data type.
